Career Objective

Assertive and impact-driven software developer specializing in Artificial Intelligence, committed to delivering user-focused solutions.

Education

NIST University Nov 2022 – Apr 2026
B.Tech in Computer Science
◦ GPA: 3.5/4.0
De Paul School, Berhampur Apr 2020
ICSE Class X
◦ Percentage: 88.60%
De Paul School, Berhampur Mar 2022
ISC Class XII
◦ Percentage: 89.75%

Technologies

Languages: C, Java, JavaScript, Python
Libraries & Frameworks: React.js, Node.js, FastAPI, LlamaIndex, RAG
Specialization: AI, ML
Tools & Infrastructure: Docker, Git

Experience

Associate Trainee Cylicon Software Solutions
Website Development Dec 2025 – Feb 2026
◦ Contributed to the development of [My Divine Wedding](#) matrimony platform implementing user and admin authentication, SMTP-based email verification, profile management, event system, and matchmaking features, enabling secure onboarding and fast user connections.
Software Engineer Intern RINL, Vizag
Website Development June 2025 – July 2025
◦ Built [UPS Contract Management System](#) enabling centralized complaint management, preventive maintenance tracking, and tool/component lifecycle management, significantly improving operational efficiency.

Projects

ATTER: AI-Driven Two-Tier Emergency Response System Sep 2025 – Apr 2026
◦ Developed [ATTER](#) an efficient emergency response in remote and high-traffic areas by developing a system using CNN (terrain analysis), MLP (traffic prediction), and a Dynamic Rendezvous Neural Network (DRNN) for reducing the travel time of patients.
ASCENDRA Apr 2026
◦ Building [Ascendra](#), a zero-effort LinkedIn job search automation, as measured by fully automated HR connections, messaging, and post creation without manual input, by developing an AI agent using LLMs (Groq LLaMA 3.3), simple intent detection, and safe automation with human review controls.

Interests and Activities

Language and Culture: Keen interest in British English and literary expression.
Club Society: Core Member of the University's Astronomy Club.
